

# HIGH TECH Motion

1.0 RIDUTTORI A VITE SENZA FINE U  
 1.0 WORM GEARBOXES U  
 1.0 SCHNECKENGETRIEBE U

U

**1.1 Caratteristiche tecniche**

STM presenta un nuovo riduttore di moderna concezione a forma cubica. Questa forma del riduttore permette universalità di fissaggio e modularità estrema per lo stoccaggio del prodotto finito: con l'adozione di un giunto d'accoppiamento al quale possono essere accoppiati tutti i motori Brushless e IEC si garantisce così un'ulteriore versatilità delle configurazioni possibili e l'eliminazione del fenomeno di fretting. La carcassa è disegnata in modo da ottimizzare lo smaltimento del calore e semplificare le operazioni di pulizia, anche negli ambienti più ostili.

**1.1 Technical characteristics**

STM introduces a new range of cube-shaped worm gearboxes. This execution is suitable for a wide variety of fixing possibilities and allows a better modularity of the components in stock. In fact, through an input coupling it is possible to connect all sizes IEC and brushless electric motors and enable a wide range of possible gearbox configurations as well as improving the overall quality by eliminating the fretting. The body has been designed in order to optimize the heat dissipation and to simplify the cleaning of it, even in the most difficult environmental conditions.

**1.1 Technische Eigenschaften**

STM stellt ein neues modern gestaltetes Getriebe in kubischer Form vor. Diese Getriebeform bietet universelle Befestigungsmöglichkeiten und ist äußerst anpassungsfähig bei der Lagerung des Endproduktes: durch die Verwendung einer Kupplung, an die alle bürstenlosen Motoren und IEC angeschlossen werden können, wird die Vielseitigkeit der möglichen Konfigurationen erhöht und die Beseitigung des Phänomens „Fressen“ sichergestellt. Das Gehäuse ist so konzipiert, dass die Wärmeableitung optimiert ist und die Reinigungsarbeiten vereinfacht werden, und dies auch unter schwierigsten Bedingungen.

**1.1 Caratteristiche tecniche****Caratteristiche giunto STM**

- Ingombri **Ridotti**;
- Semplicità di connessione;
- **NO** Fretting;
- **NO** Vibrazioni;
- Progettato per garantire efficienza e affidabilità con servizi gravosi in presenza di urti e con numerosi avviamenti.

**1.1 Technical characteristics****STM Special features - Coupling**

- **Reduced Sizes**
- **Simplified connections**
- **No fretting**
- **No vibrations**
- *Designed in order to warrant efficiency and reliability with heavy duty in case of bumps and frequent start-ups*

**1.1 Technische Eigenschaften****Die STM Sondermerkmale - Kupplung:**

- Verringerter Platzbedarf;
- Einfacher Anschluss;
- Keine Abnutzung;
- Keine Vibrationen;
- Gewährleistet Effizienz und Zuverlässigkeit bei hoher Belastung, Stossbeeinträchtigung und zahlreichen Maschinen-Starts.

**MATERIALE:**

- 1 - Vite senza fine  
Acciaio Cementazione;
- 2 - Pioli - - Acciaio per cuscinetti
- 3 - Giunto - Tecnopolimero PA 46
- 4 - Semigiunto - Acciaio da bonifica.

**MANUTENZIONE:**

- Facilità di Montaggio motore;
- Facilità di Smontaggio

**MODULARITA':**

- Possibilità di utilizzare il giunto sulle serie "RMI" - "CRMI".

**TEMPI DI CONSEGNA:**

- Maggiore modularità del prodotto;
- Stock a magazzino del prodotto assemblato.

**MATERIAL:**

- 1 - Worm gear – cementation steel
- 2 - Pin – bearing steel
- 3 - Coupling – techno polymer PA 46
- 4 - Coupling half - tempered steel

**MAINTENANCE:**

- Easy motor assembly;
- Easy disassembly.

**MODULARITY:**

- Possibility of coupling's using specially those of "RMI" - "CRMI" series.

**DELIVERY DATES**

- Higher product's modularity
- Stock warehouse finished product.

**MATERIAL:**

- 1 – Schneckenwelle - Einsatzstahl
- 2 – Stifte – Lagerstahl
- 3 – Kupplung – Technopolymer PA 46
- 4 – Kupplungshälfte – Stahl wärmebehandelt

**WARTUNG:**

- Einfacher Motoreinbau;
- Einfacher Ausbau.

**MODULARITÄT**

- Die Kupplung kann in den Serien „RMI“ - „CRMI...G“ verwendet werden.

**LIEFERZEITEN:**

- Größere Modularität des Produktes;
- Montiertes Produkt im Lagerbestand

**1.2 Designazione**

**1.2 Designation**

**1.2 Bezeichnung**

**04 IR- Rapporto di riduzione**

**IR - Reduction ratio**

**IR - Übersetzungsverhältnis**

(Vedi prestazioni). Tutti i valori dei rapporti sono approssimati. Per applicazioni dove necessita il valore esatto consultare il ns. servizio tecnico.

(See ratings). Ratios are approximate values. If you need exact values for a specific application, please contact our Engineering.

(Siehe "Leistungen"). Bei allen Werten der Übersetzungen handelt es sich um approximative Wertangaben. Bei Applikationen, bei denen die exakte Wertangabe erforderlich ist, muss unser Technischer Kundendienst konsultiert werden.

## 1.2 Designazione

### 16 MPOF - Lato Flangia Uscita

— Nessuna indicazione = flangia uscita con montaggio destro (flange dal lato come indicato nelle figure);

**SIN** = flange uscita con montaggio sinistro (flange dal lato opposto alle figure indicate).

## 1.2 Designation

### MPOF - Mounting Position Output

— No indication (standard) = output flange on right side (like indicated in the figures);

**SIN** = output flange on left side (flanges on the opposite side like indicated in figures).

## 1.2 Bezeichnung

### MPOF - Montageseite Abtriebsflansch

— Keine Angabe (Standard) = Abtriebsflansch rechts (wie in den Abbildungen dargestellt)

**SIN** = Abtriebsflansch links (gegenüber der Position in den Katalogabbildungen).

### 17 MP - Posizioni di montaggio

[M2, M3, M4, M5, M6] Posizioni di montaggio con indicazione dei tappi di livello, carico e scarico; se non specificato si considera standard la posizione **M1** (vedi par. 1.4)

### MP - Mounting positions

[M2, M3, M4, M5, M6] Mounting position with indication of breather level and drain plugs; if not specified, standard position is **M1** (see par. 1.4).

### MP - Einbaulagen

Montageposition [M2, M3, M4, M5, M6] mit Angabe von . Entlüftung, Schaugläsern und Ablasschraube. Wenn nicht näher spezifiziert, wird die Standard - position **M1** zugrunde gelegt (s. Abschnitt 1.4).

|  |      | OPT2    | Verniciatura                              | Painting and surface protection      | Lackierung und Oberflächenschutzl          |

### 19 PMT - Posizioni della Morsettieria

[2, 3, 4] Posizione della morsettieria del motore se diversa da quella standard (1).

**N.B.**

La configurazione standard della flangia at- tacco motore prevede 4 fori a 45°.

Per le flange contrassegnate con il simbolo (\*) (vedi pagina B10) i fori per il fissaggio al motore sono disposti in croce (esempio +). Pertanto è opportuno valutare l'ingombro della morsettieria del motore che verrà installato in quanto essa verrà a trovarsi orientata a 45° rispetto agli assi. Per la scelta della posizione della morsettieria rispetto agli assi fare riferimento allo schema seguente (in cui la posizione 5 è quella standard):

### PMT - Position Terminal Box

[2, 3, 4] Position of the motor terminal box if different from the standard one (1).

**Note.**

The standard configuration for the 4 holes is 45° to the axes (like an x: see par 2.3).

For the flanges marked with (\*) (see page B10) the holes to fit the motor are on the axes (like a +). Therefore we suggest to check the dimensions of the terminal board of the motor as it will be at 45° to the axes. Please choose the terminal board position referring to the following sketch (in which n° 5 is the standard position):

### PMT - Montageposition Klemmenkasten

Montageposition Klemmenkasten [2, 3, 4], wenn abweichend von Standardposition [1] (für Motortriebe).

**HINWEIS.**

In der Standardkonfiguration sind die 4 Flansch- bohrungen im 45°-Winkel zu den Achsen angeordnet

Bei Flanschen, die mit (\*) (Siehe auf Seite B10) gekennzeichnet sind, sind die Bohrungen auf den Achsen angeordnet (wie ein +). Es sollte deshalb der Platzbedarf des Motorklemmenkastens beachtet werden, da er sich in 45°-Position zu den Achsen befinden wird. Die Lage des Klemmenkastens des Motors wählen Sie bitte anhand der folgenden Skizze (Pos. 5 ist Standardposition):

1.4 Lubrificazione

1.4 Lubrication

1.4 Schmierung

**M3-M4**  
Particolare attenzione va posta per i riduttori montati nelle posizioni M3 e M4 che sono forniti con il cuscinetto schermato.

**M3-M4**  
Particular attention should be paid to worm gearboxes with a shielded bearing mounted in positions M3 and M4.

**M3-M4**  
Besondere Aufmerksamkeit sollte den Getrieben zukommen, die in den Einbautagen M3 und M4 montiert werden und mit abgeschirmtem Lager geliefert werden.

TARGHETTA - RIDUTTORE

**NON NECESSARIA**  
Indicata sempre nella targhetta del riduttore la posizione di montaggio "M1".

Identification Plate - Gearbox

**NOT NECESSARY**  
The mounting position is always indicated on the nameplate "M1".

Typeschild - Getriebe

**NICHT ERFORDERLICH**  
Die Einbaulage ist immer auf dem Typenschild angegeben "M1".

**NECESSARIA**  
La posizione richiesta è indicata nella targhetta del riduttore

**NECESSARY**  
The indication it on the label of the gearbox

**ERFORDERLICH**  
Findet man die angefragte Position auf dem Typenschild des Getriebe

**Attenzione !:**  
Il tappo di sfiato è allegato solo nei riduttori che hanno più di un tappo olio

**Warning!:**  
A breather plug is supplied only with worm gearboxes that have more than one oil plug

**Achtung!:**  
Der Entlüftungstopfen ist lediglich bei den Getrieben vorhanden, die über mehr als einen Öfüllstopfen verfügen

**Nota:** Se in fase d'ordine la posizione di montaggio è omessa, il riduttore verrà fornito con i tappi predisposti per la posizione M1.

**Note:** If the mounting position is not specified in the order, the worm gearbox supplied will have plugs pre-arranged for position M1.

**Anmerkung:** Sollte in der Auftragsphase die Einbaulage nicht angegeben werden, wird das Getriebe mit Stopfen für die Einbaulage M1.

Eventuali forniture con predisposizioni tappi diverse da quella indicata in tabella, dovranno essere concordate.

The supply of gearboxes with different plug pre-arrangements has to be agreed with the manufacturer.

Lieferungen, die eine Auslegung hinsichtlich der Stopfen aufweisen, die von den Angaben in der Tabelle abweichen, müssen vorab vereinbart werden..

### 1.5 Carichi radiali e assiali

Quando la trasmissione del moto avviene tramite meccanismi che generano carichi radiali sull'estremità dell'albero, è necessario verificare che i valori risultanti non eccedono quelli indicati nelle tabelle.

Nella Tab. 2.5 sono riportati i valori dei carichi radiali ammissibili per l'albero veloce ( $Fr_1$ ). Come carico assiale ammissibile contemporaneo si ha:

$$Fa_1 = 0.2 \times Fr_1$$

Tab. 2.5

**UI**

| $n_1$<br>min <sup>-1</sup> | $Fr_1$ (N) |     |     |     |      |      |

| <b>18</b>                  | 2100       | 2850 | 3100 | 4900 | 6650 | 7800 |
| <b>14</b>                  | 2300       | 3200 | 3300 | 5200 | 7025 | 8250 |

A richiesta possono essere fornite versioni rinforzate con cuscinetti a rulli conici sulla corona in grado di sopportare carichi superiori a quelli ammessi dalle versioni normali.

Si veda a tal proposito la tabella 2.9, in cui sono riportati i valori dei carichi radiali e assiali ammissibili sull'albero uscita nel caso di cuscinetti conici sulla corona. Si consiglia, in questi casi, di adottare versioni flangiate, verificando che il carico assiale venga interamente assorbito dal cuscinetto alloggiato nella flangia di fissaggio.

### 1.5 Axial and overhung loads

*Should transmission movement determine radial loads on the angular shaft end, it is necessary to make sure that resulting values do not exceed the ones indicated in the tables.*

*In Table 2.5 permissible radial load for input shaft are listed ( $Fr_1$ ). Contemporary permissible axial load is given by the following formula:*

$$Fa_1 = 0.2 \times Fr_1$$

### 1.5 Radiale und Axiale Belastungen

Wird das Wellenende auch durch Radialkräfte belastet, so muß sichergestellt werden, daß die resultierenden Werte die in der Tabelle angegebenen nicht überschreiten.

In Tabelle 2.5 sind die Werte der zulässigen Radialbelastungen für die Antriebswelle ( $Fr_1$ ) angegeben. Die Axialbelastung beträgt dann:

$$Fa_1 = 0.2 \times Fr_1$$

*In Table 2.7 permissible radial loads for output shaft are listed ( $Fr_2$ ). Permissible axial load is given by the following formula:*

$$Fa_2 = 0.2 \times Fr_2$$

In Tabelle 2.7 sind die Werte der zulässigen Radialbelastungen für die Abtriebswelle angegeben.

Als zulässige Axialbelastung gilt:

$$Fa_2 = 0.2 \times Fr_2$$

*In order to increase the load capacity of the gearboxes it is possible to fit taper roller bearings on to the output shaft. Such reinforced versions are available upon request.*

*With regard to this reinforced version, let see output radial and axial load values shown on tab. 2.9. It's advisable to use flange mounted versions and to make sure that the axial load is absorbed by the bearing, housed in the fixing flange.*

Für größere Belastungen stehen auf Wunsch auch verstärkte Ausführungen mit Kegelrollenlagern für die Schneckenwelle zur Verfügung.

Tabelle 2.9 listet die zulässigen Radial- und Axiallasten bei Verwendung von Kegelrollenlagern auf. Es wird in diesen Fällen empfohlen, Flanschausführungen zu verwenden und sicherzustellen, daß die axiale Last vollständig vom Lager, das sich im Befestigungsflansch befindet, aufgenommen wird.

I carichi radiali indicati nelle tabelle si intendono applicati a metà della sporgenza dell'albero e sono riferiti ai riduttori operanti con fattore di servizio 1.

Valori intermedi relativi a velocità non riportate possono essere ottenuti per interpolazione considerando però che Fr<sub>1</sub> a 500 min<sup>-1</sup> e Fr<sub>2</sub> a 14 min<sup>-1</sup> rappresentano i carichi massimi consentiti.

Per i carichi non agenti sulla mezzeria dell'albero lento o veloce si ha:

*The radial loads shown in the tables are applied on the centre line of the shaft extension and are related to gearboxes working with service factor 1.*

*Intermediate values of speeds that are not listed can be obtained through interpolation but it must be considered that Fr<sub>1</sub> at 500 min<sup>-1</sup> and Fr<sub>2</sub> at 14 min<sup>-1</sup> represent the maximum allowable loads.*

*For loads which are not applied on the centre line of the output or input shaft, following values will be obtained:*

Bei den in der Tabelle angegebenen Radialbelastungen wird eine Kräfteinwirkung auf die Mitte des Wellenendes zugrunde gelegt; außerdem arbeiten die Getriebe mit Betriebsfaktor 1. Zwischenwerte für nicht aufgeführte Drehzahlen können durch Interpolation ermittelt werden. Hierbei ist jedoch zu berücksichtigen, daß die Werte von Fr<sub>1</sub> bei 500 min<sup>-1</sup> und von Fr<sub>2</sub> bei 14 min<sup>-1</sup> die Maximalbelastungen repräsentieren.

Bei Lasten, die nicht auf die Mitte der Ab- bzw. Antriebswellen wirken, legt man folgende Werte zugrunde:

a 0.3 della sporgenza:  
 $Fr_x = 1.25 \times Fr_{1-2}$

a 0.8 dalla sporgenza:  
 $Fr_x = 0.8 \times Fr_{1-2}$

at 0.3 from extension:  
 $Fr_x = 1.25 \times Fr_{1-2}$

at 0.8 from extension:  
 $Fr_x = 0.8 \times Fr_{1-2}$

0.3 vom Wellenabsatz:  
 $Fr_x = 1.25 \times Fr_{1-2}$

0.8 vom Wellenabsatz:  
 $Fr_x = 0.8 \times Fr_{1-2}$

⚠ ATTENZIONE!

Per situazioni con velocità di ingresso particolari attenersi alla tabella pagina A2.

I pesi riportati sono indicativi e possono variare in funzione della versione del riduttore.

N.B. Per i riduttori evidenziati dal doppio bordo nella colonna delle potenze è necessario verificare lo scambio termico del riduttore (come nel par. 1.7-A). Per maggiori informazioni contattare l'ufficio tecnico STM.

⚠ WARNING!

If in presence of non standard input speed please attain to the page A2.

Listed weights are for reference only and can vary according to the gearbox version.

NOTE. Please pay attention to the frame around the input power value: for this gearboxes it's important to check the thermal capacity (comp. chapter 1.7-A). For details please contact our technical department.

⚠ ACHTUNG!

Mit unstandardisierte Antriebsgeschwindigkeit bitte auf Seite A2.

Die angegebenen Gewichte sind Richtwerte und können je nach Getriebeversion etwas variieren.

HINWEIS. Sind in den Tabellen Nennleistungen eingerahmt, so ist die thermische Leistungsgrenze der Getriebe zu beachten (s. S. 1.7-A). Für weitere Informationen wenden Sie sich bitte an unser technisches Büro.

**⚠ ATTENZIONE!**

Per situazioni con velocità di ingresso particolari attenersi alla tabella pagina A2.

I pesi riportati sono indicativi e possono variare in funzione della versione del riduttore.

N.B. Per i riduttori evidenziati dal doppio bordo nella colonna delle potenze è necessario verificare lo scambio termico del riduttore (come nel par. 1.7-A). Per maggiori informazioni contattare l'ufficio tecnico STM.

**⚠ WARNING!**

*If in presence of non standard input speed please attain to the page A2.*

*Listed weights are for reference only and can vary according to the gearbox version.*

*NOTE. Please pay attention to the frame around the input power value: for this gearboxes it's important to check the thermal capacity (comp. chapter 1.7-A). For details please contact our technical department.*

**⚠ ACHTUNG!**

Mit unstandardisierte Antriebsgeschwindigkeit bitte auf Seite A2.

Die angegebenen Gewichte sind Richtwerte und können je nach Getriebeversion etwas variieren.

HINWEIS. Sind in den Tabellen Nennleistungen eingerahmt, so ist die thermische Leistungsgrenze der Getriebe zu beachten (s. S. 1.7-A). Für weitere Informationen wenden Sie sich bitte an unser technisches Büro.

N.B.  
Tutte le potenze indicate si riferiscono alla potenza meccanica dei riduttori.  
Per i riduttori contrassegnati con (\*) è opportuno effettuare la verifica della potenza limite termico secondo le indicazioni riportate nel par. 1.7-A

NOTE.  
The indicated power is based on the mechanical capacities of the gearboxes.  
For the gearboxes marked with (\*) it is also necessary to obey the thermal capacity like shown on chapter 1.7-A.

HINWEIS.  
Die Leistungsangaben beziehen sich auf die mechanische Belasbarkeit der Getriebe.  
Bei den mit (\*) gekennzeichneten Getrieben ist außerdem die thermische Leistungsgrenze zu beachten (s. Kap. 1.7-A).

N.B.  
Tutte le potenze indicate si riferiscono alla potenza meccanica dei riduttori.  
Per i riduttori contrassegnati con (\*) è opportuno effettuare la verifica della potenza limite termico secondo le indicazioni riportate nel par. 1.7-A

NOTE.  
The indicated power is based on the mechanical capacities of the gearboxes.  
For the gearboxes marked with (\*) it is also necessary to obey the thermal capacity like shown on chapter 1.7-A.

HINWEIS.  
Die Leistungsangaben beziehen sich auf die mechanische Belasbarkeit der Getriebe.  
Bei den mit (\*) gekennzeichneten Getrieben ist außerdem die thermische Leistungsgrenze zu beachten (s. Kap. 1.7-A).

Tutti i riduttori a vite senza fine sono forniti con albero lento cavo.  
A richiesta, possono essere forniti alberi lenti come indicato nei disegni dimensionali.  
Le dimensioni delle linguette sono conformi alle norme UNI 6604-69.

All worm gearboxes are supplied with hollow output shaft. Output shafts as shown in the size drawings can be supplied upon request.  
Sizes of feathers comply with standards UNI 6604-69.

Alle Schneckengetriebe werden mit hohler Abtriebswelle geliefert. Auf Anfrage können Abtriebswellen gemäß den Maßzeichnungen geliefert werden.  
Die Abmessungen der Federn entsprechen den Normen UNI 6604-69.

**ATTENZIONE**  
L'albero lento sporgente è fornito per essere installato sulla versione del riduttore con albero **CAVO** con diametro **STANDARD**.

**ATTENTION**  
The output shaft is available only for standard hollow shaft diameter.

**Achtung:**  
Die Einseitige Abtriebswelle wird fuer die Montage bei Getrieben mit Standart Hohlwelle geliefert.

**N.B.**  
Tutti gli alberi lenti vengono forniti in kit di montaggio completi di linguette, rondelle, viti (e anelli elastici seeger per l'albero bisporgente)

**NOTE**  
All output shafts are supplied in kit complete with feathers, washers and screws (as well as snap rings for the double extended shaft).

**HINWEIS**  
Alle Abtriebswellen werden als Bausätze komplett mit Federn, Scheiben und Schrauben geliefert (bei der beidseitigen Abtriebswelle auch die Seegerringe).

**BRS VKL** BRS\_VKL - Braccio Reazione Semplice\_con boccola\_VKL  
 BRS\_VKL - Torque arm - Single\_with VKL\_bushing  
 BRS\_VKL - Drehmomentstütze - Normal\_mit VKL - Buchse

Per il fissaggio del riduttore mediante tirante, viene fornito in allegato l'apposito braccio di reazione.

*If the gearbox shall be shaft mounted as an extra part there is also available a torque arm.*

Soll das Getriebe pendelnd gelagert werden, so ist als Zubehörteil auch eine Drehmomentstütze.
